

# A QUICK **think** DRAWING GAME

**BORED?** Or just needing some inspiration? I think of boredom as a state of anticipation, where something's GOING To Happen but we just don't know what or when. We don't have to fix it, something always comes along. Look at these 6 Doodle Cards and use them to draw 3 things you might find in the kitchen. Then use them to draw 3 things you might find on Mars. Then draw 3 things starting with P that you would definitely find in the kitchen of a Martian, usually on Thursdays.
